1. Applicant's election of Group I in the reply filed on 7/18/05 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-7 rejected under 35 U.S.C. 103(a) as being unpatentable over Gruen et al (5,989,511 or 5,227,760).

Gruen et al discloses the claimed nano-crystalline diamond having the claimed thickness and the produced by the claimed method. While Gruen et al does not explicitly disclose the exclusion of graphite, Gruen et al says that the diamond films are essentially sp<sup>3</sup> bonding which infers that no graphite is present. The claimed stress and absorption peaks are considered inherent.
